

EXCALIBUR II

Professional Beach and Underwater Detector

EXCALIBUR

Featuring:

- New high visibility fluorescent decal and coil cover
- New Slimline Coil for reduced weight and improved balance
- New improved NiMH battery pack
- High impedance Koss waterproof headphones
- Waterproof to 200 feet (66 meters)

Minelab's unique easy to use Multi-Frequency technology with Automatic Ground Rejection makes the Excalibur II the ideal machine to work in difficult beach and underwater conditions. Excalibur II advanced technology provides for seamless transition from dry to wet sand.

With two operating modes, switch to Discriminate and eliminate unwanted trash or switch to Pinpoint and detect all metals. Whether you're working the beach, wading or diving for treasure, the Excalibur II will perform every time!

EXCALBUR II

SERIOUS DETECTING™
